

DONAX[®] TD TRIPLETS

Farm Equipment Fluids

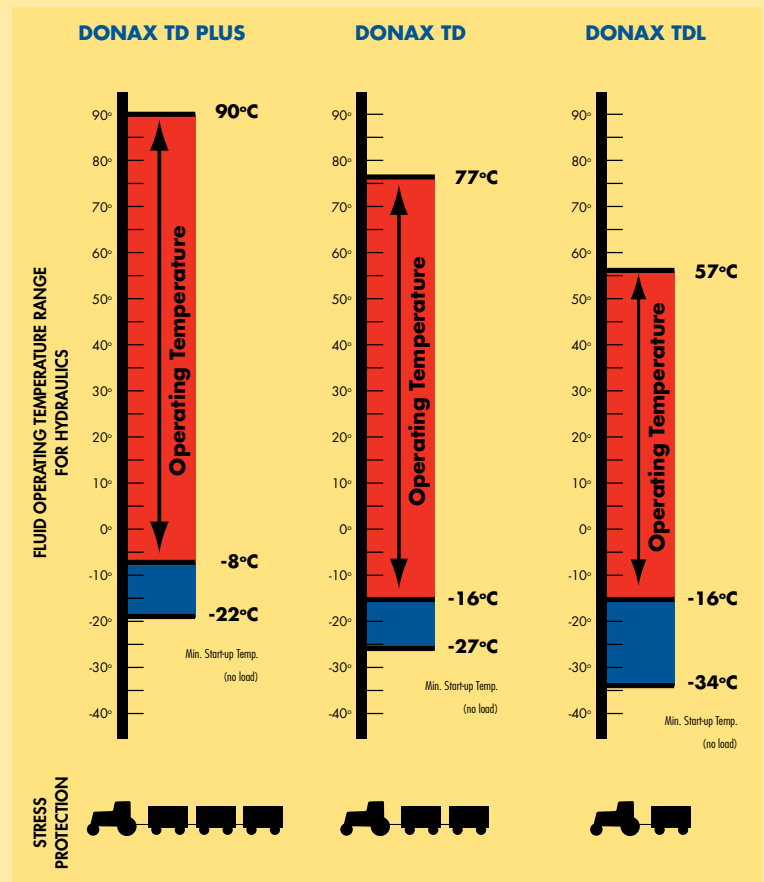

to match all your equipment needs

Shell's **Donax TD** universal tractor fluids provide excellent lubrication for a wide variety of farm equipment.

You can count on **Donax TD** fluids for:

- Transmission, hydraulic, wet brake and PTO (Power Takeoff) applications
- Helps extend equipment life
- Next generation brake noise suppression
- Additional high temperature capabilities from **Donax TD Plus**
- For use in both new and older tractors and auxiliary equipment
- Recommended for AGCO, Case, John Deere, Massey Ferguson, New Holland and other farm equipment
- Satisfies Caterpillar multipurpose tractor oil and hydraulic anti-wear requirements
- Suitable in some construction and forestry equipment

Shell offers a variety of **Donax TD** products, delivering stress protection capabilities and operating temperature ranges to match your specific operational needs.

DONAX[®] TC

Are you using the right transmission/drivetrain oil for your Caterpillar construction, forestry and farming equipment?
You should be using a TO-4 fluid, like **Donax TC**.

Shell Donax TC provides these benefits:

- Formulated for new and older Caterpillar Powershift Transmissions, especially VCTC (Variable Capacity Torque Converters)
- Caterpillar TO-4, TO-2 approved SAE 10W, 30, 50
- Improved transmission life
- Longer clutch life
- Formulated for Allison C4 and C3 applications
- Anti-wear protection exceeds Caterpillar requirements

Recommended Ambient Temperatures °C – for Donax* TC			
Application	SAE 10W	SAE 30	SAE 50
Hydrostatic Transmission	-20 to 40	-	-
Hydraulics	-20 to 40	10 to 50	-
Powershift Transmissions	-25 to 10	-15 to 35	-5 to 50
Final Drives	-30 to 0	-25 to 25	-15 to 50

Donax CFD 60 is available for Caterpillar FD-1 final drive and axle requirements.

Donax TD Plus, TD and TDL are available for Caterpillar multipurpose tractor oil requirements.
